AN ICON YOU SHOULD KNOW...

Massimo Vignelli

Italian graphic, product and interior designer, 1931 to 2014

Massimo Vignelli believed a few good typefaces and a strong grid could solve almost any design problem. With his wife and partner, Lella Vignelli, he designed logos, maps, books, furniture and interiors. His work for American Airlines, Bloomingdale's and the National Park Service still shapes how millions of people see brands and find their way. Read this page in about five minutes, then use the links at the end to look deeper.

01 Fact Sheet

1931	Born January 10 in Milan, Italy.
1950s	Studies architecture at the Politecnico di Milano.
1957	Comes to the United States on a fellowship. He returns to Italy in 1960.
1966	Co-founds the New York office of Unimark International.
1968	Leads a new identity program for American Airlines.
1971	Leaves Unimark and starts Vignelli Associates with Lella Vignelli.
1972	His diagram map of the New York subway goes up in stations. He also gives Bloomingdale's a new logo and packaging.
1977	The National Park Service begins using his Unigrid system.
1982	Receives the AIGA Medal with Lella Vignelli.
1985	Receives the first Presidential Design Award, for the Park Service publications.
2010	*The Vignelli Canon* comes out in print, after a free e-book in 2009.
2014	Dies May 27 in New York.

02 Four Key Works

Vignelli often worked with just one or two typefaces, so many of his best-known marks are simple type. The 1972 subway map is still in copyright, so it is linked under Further Looking.

1968: American Airlines

One typeface and two colors for a national airline

In 1967 American Airlines began to review its look. In 1968 a new identity program was created under Vignelli's direction at Unimark. He later said the approach was "not styling but reductionist based on the notion of timelessness." The name is set in Helvetica, with American in red and Airlines in blue. A stylized eagle sat between two letter A's in the symbol, and that mark lasted until January 2013. When the airline changed it, Vignelli said the new look had "no sense of permanence."

1971: Heller

A name that became a logo

Alan Heller's company made Vignelli's stacking plastic dinnerware. Heller later wrote that "Massimo designed our Heller logo back in 1971, and it has stood the test of time." In a 2014 tribute, Heller remembered that it all started with the logo, "in Helvetica of course," and that every meeting began with Vignelli drawing his name. The mark is only the word, set bold and tight in white on red.

1972: Bloomingdale's

A store name that became its own pattern

Bloomingdale's turned 100 in 1972 and hired Vignelli to give the New York department store a new graphic identity. It included a custom typeface, Bloomingtype, which combines Avant Garde and Futura. The store still calls Vignelli "the legendary graphic designer behind our custom logotype." He also designed its Big Brown Bag, which first reached stores in 1973. The name and one plain color carry the whole brand.

1977: Unigrid

One grid for every park brochure

In 1977 the Park Service's publications chief, Vincent Gleason, brought in Vignelli to make brochures faster and cheaper to produce. Together with the Harpers Ferry Center staff they built the Unigrid, a fixed system of folds, grid and type. The National Park Service says the 1978 brochure for Clara Barton National Historic Site was the first to use the Unigrid. A black band with white type runs across the top. The parks still use the system today.

TRY THIS

Vignelli used only a handful of typefaces in his whole career. Pick one typeface and two colors. Design a poster, a sign and a small brochure for the same event on a simple grid. See how the limits make the three pieces feel like one family.

IMAGE POLICY Copyrighted artworks, designs and resource screenshots are linked rather than reproduced here. Where an image is omitted, follow the official source link above. Hosted third-party images are limited to the verified public-domain and openly licensed images credited on page 3.

REFLECT

Think About It

Vignelli's subway map was clear but did not match the streets above, and the MTA replaced it in 1979. When should a design be simpler than the real thing, and when does that go too far?
